

AMENDMENTS TO THE ABSTRACT

To the extent that the Abstract of the current patent application was submitted within the PCT application so that it did not appear at the end of the claims, Applicants respectfully request deletion of the incorrectly positioned Abstract, and further request that the application be amended by adding the Abstract enclosed herewith as a new Page 31 for the application, with the Abstract on new Page 31 corresponding identically to the Abstract which was printed on the front page of the PCT Publication of the current application identified as WO 03/089974 A1.

SWITCHING/LIGHTING CORRELATION SYSTEM

ABSTRACT OF THE DISCLOSURE

A correlation system (100) is disclosed, for use with a lighting system (102). The lighting system (102) is associated with one or more wands (104) so as to initially configure or reconfigure relationships and correlation among switches and lights of the lighting system (102). The lighting system (102) includes a plurality of lighting units (106). The lighting system (102) also includes a plurality of switch units (128). The wand (104) includes an IR emitter (160) to transmit signals to said lighting units (106) and to said switch units (128) so as to effect controlling relationships among the switch units (128) and lighting units (106).
